

COVID-19 Prevention Program (CPP)
Washington Unified School District

COVID-19 Prevention Program (CPP) for Washington Unified School District

This CPP is designed to control employees' exposures to the SARS-CoV-2 virus (severe acute respiratory syndrome coronavirus 2) that causes COVID-19 (Coronavirus Disease 2019) that may occur in our workplace.

Date: March 15, 2022

Authority and Responsibility

Sophia Rizzo, Ed.D., Assistant Superintendent, has overall authority and responsibility for implementing the provisions of this CPP in our workplace. In addition, all managers and supervisors are responsible for implementing and maintaining the CPP in their assigned work areas and for ensuring employees receive answers to questions about the program in a language they understand.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

Identification and Evaluation of COVID-19 Hazards

We implement the following in our workplace:

- Conduct workplace-specific evaluations using the **Appendix A: Identification of COVID-19 Hazards** form.
- Document the vaccination status of our employees, which is maintained as a confidential medical record.
- Evaluate employees' potential workplace exposures to all persons at, or who may enter, our workplace.
- Develop COVID-19 policies and procedures to respond effectively and immediately to individuals at the workplace who are a COVID-19 case to prevent or reduce the risk of transmission in the workplace.
- Review applicable orders and general and industry-specific guidance from the State of California, Cal/ OSHA, and the local health department related to COVID-19 hazards and prevention.
- Evaluate existing COVID-19 prevention controls in our workplace and the need for different or additional controls.
- Conduct periodic inspections using the **Appendix B: COVID-19 Inspections** form as needed to identify and evaluate unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with our COVID-19 policies and procedures.

Employee participation

Employees and their authorized employees' representatives are encouraged to participate in the identification and evaluation of COVID-19 hazards by: **Self certifying their health by utilizing the COVID-19 screening questionnaire.**

Employee screening

We screen our employees and respond to those with COVID-19 symptoms by: All WUSD employees who report to work are required to self-certify their health by answering the questions below prior to starting their work day:

1. Are you feverish?
2. Do you have chills?
3. Do you have a new or worsening cough?
4. Do you have shortness of breath?
5. To your knowledge, have you had close contact with anyone diagnosed with COVID-19 in the past 14 days?
6. Have you traveled outside of the county in the past 14 days?

Correction of COVID-19 Hazards

Unsafe or unhealthy work conditions, practices or procedures are documented on the **Appendix B: COVID-19 Inspections** form, and corrected in a timely manner based on the severity of the hazards, as follows: Follow the COVID-19 Positive Test Results Process

Control of COVID-19 Hazards

Face Coverings

We provide clean, undamaged face coverings and ensure they are properly worn by employees that are not fully vaccinated when they are indoors or in vehicles, and where required by orders from the California Department of Public Health (CDPH). **Ensure the face coverings used in the workplace meet the section 3205(b)(8) “face covering” definition and requirements, and the 3205(b)(9) definition of “fully vaccinated” is applied].**

Employees required to wear face coverings in our workplace may remove them under the following conditions:

- When an employee is alone in a room or a vehicle.
- While eating or drinking at the workplace, provided employees are at least six feet apart and outside air supply to the area, if indoors, has been maximized to the extent feasible.
- When employees are required to wear respirators in accordance with our respirator program that meets section 5144 requirements.
- Employees who cannot wear face coverings due to a medical or mental health condition or disability, or who are hearing-impaired or communicating with a hearing-impaired person. Such employees will wear an effective, non-restrictive alternative, such as a face shield with a drape on the bottom, if their condition permits it. If their condition does not permit it, then the employee will be at least six feet apart from all other persons and either fully vaccinated or tested at least weekly for COVID-19.
- Specific tasks that cannot feasibly be performed with a face covering. This exception is limited to the time in which such tasks are being performed.

Any employee not wearing a required face covering will be at least six feet apart from all other persons unless the unmasked employee is either fully vaccinated or **tested at least weekly for COVID-19.**

We will not prevent any employee from wearing a face covering when it is not required unless it would create a safety hazard, such as interfering with the safe operation of equipment.

Face coverings will also be provided to any employee that requests one, regardless of their vaccination status.

Engineering controls

For indoor locations, using Appendix B, we identify and evaluate how to maximize, to the extent feasible, ventilation with outdoor air using the highest filtration efficiency compatible with our existing ventilation system, and whether the use of portable or mounted High Efficiency Particulate Air (HEPA) filtration units, or other air cleaning systems, would reduce the risk of transmission by:

Providing filtration systems in each classroom or high traffic indoor areas.

Cleaning and disinfecting

We implement the following cleaning and disinfection measures for frequently touched surfaces and objects, such as doorknobs, elevator buttons, equipment, tools, handrails, handles, controls, phones, headsets, and bathroom surfaces:

OFFICE SETTINGS

In office settings serviced by a custodian, high-touch surfaces in common areas will be disinfected 4 times per day. In the office setting, staff may utilize disinfecting supplies that will be provided at stations around offices to disinfect computers, monitors, mouse and keyboards and personal workspaces. In the school setting, staff will be provided disinfecting supplies as appropriate. The normal disinfecting night time routine will also continue.

SCHOOL SETTINGS

WUSD custodians will disinfect classrooms each night using a fogging probiotic spray machine.

WUSD custodians will disinfect high-touch surfaces in all common areas, including door handles and light switches, each night. Classrooms, including student desks, student chairs, trash cans, in-classroom restrooms and all hard surface flooring will be disinfected one time per day.

Items such as student manipulatives, toys, equipment, teacher/paraprofessional desks and chairs or items not listed above are the responsibility of the teacher/paraprofessional to clean or disinfect. Disinfecting supplies are available to staff in designated areas or by contacting the site custodian.

BATHROOM SETTINGS

WUSD custodians will disinfect high-touch surfaces in all common areas, including door handles, light switches, faucets, toilets, and paper product dispensers each hour. Bathrooms will be fogged each night and undergo the usual disinfecting routine. In the bathroom setting, staff will be provided disinfecting supplies for use as appropriate.

***Important:* Disinfectants should not be applied on items that children might put in their mouths. Cleaning toys and other items used by children should be done with soap and water or an appropriate sanitizing solution.**

Only approved Environmental Product Agency (EPA) products will be used to disinfect.

All product label instructions shall be followed by anyone using a disinfecting product, paying attention to appropriate Personal Protective Equipment (PPE) and required product dwell time to effectively disinfect. In a school setting, anyone using a disinfecting product must have completed the Integrated Pest Management training available on your Keenan portal.

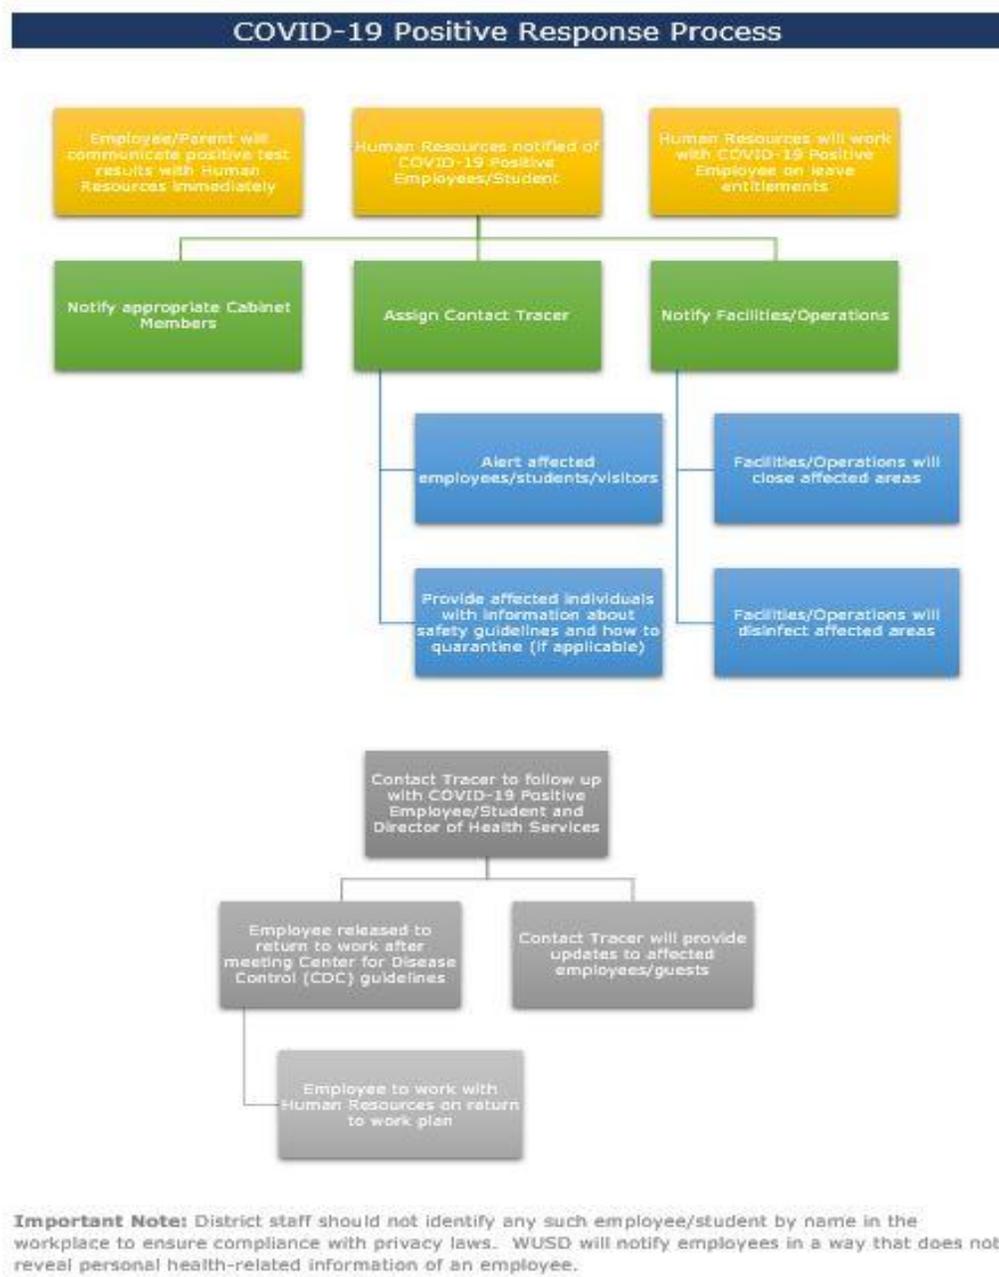

Hand sanitizing

To implement effective hand sanitizing procedures, we:

- **Evaluating handwashing facilities.**
- **Determining the need for additional facilities.**
- **Encouraging and allowing time for employee handwashing.**
- **Providing employees with an effective hand sanitizer, and prohibit hand sanitizers that contain methanol (i.e., methyl alcohol).**
- **Encouraging employees to wash their hands for at least 20 seconds each time.**

Should we have a COVID-19 case in our workplace, we will implement the following procedures:

https://docs.google.com/document/d/1lf7B3OVnsRJ_ZsT1-m2JQeOceOg1MJREqthoWy0ca3l/edit (page 17)

Personal protective equipment (PPE) used to control employees' exposure to COVID-19

We evaluate the need for PPE (such as gloves, goggles, and face shields) as required by section 3380, and provide and ensure use of such PPE as needed.

Upon request, we provide respirators for voluntary use to all employees who are not fully vaccinated and who are working indoors or in vehicles with more than one person.

We provide and ensure use of respirators in compliance with section 5144 when deemed necessary by Cal/OSHA.

We also provide and ensure use of eye and respiratory protection when employees are exposed to procedures that may aerosolize potentially infectious material such as saliva or respiratory tract fluids.

Testing of symptomatic employees

We make COVID-19 testing available at no cost to all employees who had close contact in the workplace and have COVID-19 symptoms, during employees' paid time.

Investigating and Responding to COVID-19 Cases

We have developed effective procedures to investigate COVID-19 cases that include seeking information from our employees regarding COVID-19 cases, close contacts, test results, and onset of symptoms. This is accomplished by using the **Appendix C: Investigating COVID-19 Cases** form.

We also ensure the following is implemented:

- **Employees that had a close contact are offered COVID-19 testing at no cost during their working hours.**
- **Written notice within one business day of our knowledge of a COVID-19 case that people at the worksite may have been exposed to COVID-19. This notice will be provided to all employees (and their authorized representative), independent contractors and other employers on the premises at the same worksite as the COVID-19 case during the high-risk exposure period. These notifications will meet the requirements of T8CCR section 3205(c)(3)(B) and Labor Code section 6409.6(a)(4); (a)(2); and (c).**
- **We consider a "close contact" that meets the definition as described in section 3205(b)(1) definition; "high-risk exposure period" meets the section 3205(b)(10) definition; and "worksite" meets the section 3205(b)(12) definition]**

System for Communicating

Our goal is to ensure that we have effective two-way communication with our employees, in a form they can readily understand, and that it includes the following information:

- Who employees should report COVID-19 symptoms, possible close contacts and hazards to, and how.
- That employees can report symptoms, possible close contacts and hazards without fear of reprisal.
- How employees with medical or other conditions that put them at increased risk of severe COVID-19 illness can request accommodations
- Access to COVID-19 testing when testing is required.
- The COVID-19 hazards employees (including other employers and individuals in contact with our workplace) may be exposed to, what is being done to control those hazards, and our COVID-19 policies and procedures.

Training and Instruction

We provide effective employee training and instruction that includes:

- Our COVID-19 policies and procedures to protect employees from COVID-19 hazards, and how to participate in the identification and evaluation of COVID-19 hazards.
- Information regarding COVID-19-related benefits (including mandated sick and vaccination leave) to which the employee may be entitled under applicable federal, state, or local laws.
- The fact that:
 - COVID-19 is an infectious disease that can be spread through the air.
 - COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth.
 - An infectious person may have no symptoms.
- The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing, face coverings, increased ventilation indoors, and respiratory protection decrease the spread of COVID-19 and are most effective when used in combination.
- The right of employees that are not fully vaccinated to request a respirator for voluntary use, without fear of retaliation, and our policies for providing the respirators. Employees voluntarily using respirators will be trained according to section 5144(c)(2) requirements:
 - How to properly wear them.
 - How to perform a seal check according to the manufacturer's instructions each time a respirator is worn, and the fact that facial hair can interfere with a seal.
- The importance of frequent hand washing with soap and water for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility, and that hand sanitizer does not work if the hands are soiled.
- Proper use of face coverings and the fact that face coverings are not respiratory protective equipment. Since COVID-19 is an airborne disease, N95s and more protective respirators protect the users from airborne disease, while face coverings primarily protect people around the user.
 - The conditions where face coverings must be worn at the workplace.
 - That face coverings are additionally recommended outdoors for people who are not fully vaccinated if six feet of distance cannot be maintained.
 - Employees can request face coverings and can wear them at work regardless of vaccination status and without fear of retaliation.
- COVID-19 symptoms, and the importance of obtaining a COVID-19 test and not coming to work if the employee has COVID-19 symptoms.
- Information on our COVID-19 policies and how to access COVID-19 testing and vaccination, and the fact that vaccination is effective at preventing COVID-19, protecting against both transmission and serious illness or death.

COVID-19 Training Via Keenan Safe School will be used to document this training.

Exclusion of COVID-19 Cases and Employees who had a Close Contact

Where we have a COVID-19 case or close contact in our workplace, we limit transmission by:

- Ensuring that COVID-19 cases are excluded from the workplace until our return-to-work requirements are met.
- Excluding employees that had a close contact from the workplace until our return-to-work criteria have been met, with the following exceptions:
 - Employees who were fully vaccinated before the close contact and who do not develop COVID-19 symptoms, provided they wear a face covering and maintain six feet of physical distance from others in the workplace for 14 days following the last date of close contact.
 - COVID-19 cases who returned to work per our return-to-work criteria and have remained free of COVID-19 symptoms do not need to be excluded from the workplace for 90 days after the initial onset of COVID-19 symptoms, provided they wear a face covering and maintain six feet of distance from others in the workplace for 14 days following the last date of close contact.
 - COVID-19 cases who returned to work per our return-to-work criteria who never developed

COVID-19 symptoms do not need to be excluded from the workplace for 90 days after the first positive test, provided they wear a face covering and maintain six feet of distance from others in the workplace for 14 days following the last date of close contact.

- If we do not exclude an employee who had a close contact as permitted by the above three exceptions, we will provide the employee with information about any applicable precautions recommended by CDPH for individuals with close contact.
- For employees excluded from work, continuing, and maintaining employees' earnings, wages, seniority, and all other employees' rights and benefits.
- Providing employees at the time of exclusion with information on available benefits.

Reporting, Recordkeeping, and Access

It is our policy to:

- Report information about COVID-19 cases and outbreaks at our workplace to the local health department whenever required by law, and provide any related information requested by the local health department.
- Maintain records of the steps taken to implement our written COVID-19 Prevention Program in accordance with section 3203(b).
- Make our written COVID-19 Prevention Program available at the workplace to employees, authorized employee representatives, and to representatives of Cal/OSHA immediately upon request.
- Use the **Appendix C: Investigating COVID-19 Cases** form to keep a record of and track all COVID-19 cases.

Return-to-Work Criteria

- **COVID-19 cases with symptoms** will not return to work until all the following have occurred:
 - At least 24 hours have passed since a fever of 100.4 °F. or higher has resolved without the use of fever-reducing medications, and
 - COVID-19 symptoms have improved, and
 - At least 10 days have passed since COVID-19 symptoms first appeared.
- **COVID-19 cases who tested positive but never developed symptoms** will not return to work until a minimum of 10 days have passed since the date of specimen collection of their first positive COVID-19 test.
- A negative COVID-19 test will not be required for an employee to return to work once the requirements for "cases with symptoms" or "cases who tested positive but never developed symptoms" (above) have been met.
- Persons who had a close contact may return to work as follows:
 - Close contact but never developed symptoms: after 14 days have passed since the last known close contact unless either of the following exceptions apply:
 - Ten days have passed since the last known close contact and the person wears a face covering and maintains six feet of physical distance from others while at the workplace for 14 days following the last date of close contact.
 - Seven days have passed since the last known close contact; the person tested negative for COVID-19 using a COVID-19 test with the specimen taken at least five days after the last known close contact; and the person wears a face covering and maintains six feet of physical distance from others while at the workplace for 14 days following the last date of close contact.
 - Close contact with symptoms: when the "COVID-19 cases with symptoms" criteria (above) have been met.
- If an order to isolate, quarantine, or exclude an employee is issued by a local or state health official, the employee will not return to work until the period of isolation or quarantine is completed or the order is lifted.

Appendix B: COVID-19 Inspections

Date: [enter date]

Name of person conducting the inspection: [enter names]

Work location evaluated: [enter information]

| Exposure Controls | Status | Person Assigned to Correct | Date Corrected |
|--|--------|----------------------------|----------------|
| Engineering | | | |
| Ventilation* (amount of fresh air and filtration maximized) | | | |
| Additional room air filtration* | | | |
| [Add any additional controls your workplace is using] | | | |
| Administrative | | | |
| Surface cleaning and disinfection (frequently enough and adequate supplies) | | | |
| Hand washing facilities (adequate numbers and supplies) | | | |
| Disinfecting and hand sanitizing solutions being used according to manufacturer instructions | | | |
| [Add any additional controls your workplace is using] | | | |

| Exposure Controls | Status | Person Assigned to Correct | Date Corrected |
|---|--------|----------------------------|----------------|
| PPE (not shared, available and being worn) | | | |
| Face coverings (cleaned sufficiently often) | | | |
| Gloves | | | |
| Face shields/goggles | | | |
| Respiratory protection | | | |

*Identify and evaluate how to maximize ventilation with outdoor air; the highest level of filtration efficiency compatible with the existing ventilation system; and whether the use of portable or mounted HEPA filtration units, or other air cleaning systems, would reduce the risk of COVID-19 transmission. Review applicable orders and guidance from the State of California and local health departments related to COVID-19 hazards and prevention have been reviewed, including the CDPH Interim Guidance for Ventilation, Filtrations, and Air Quality in Indoor Environments and information specific to your industry, location, and operations. We maximize the quantity of outside air provided to the extent feasible, except when the United States Environmental Protection Agency (EPA) Air Quality Index is greater than 100 for any pollutant or if opening windows or maximizing outdoor air by other means would cause a hazard to employees, for instance from excessive heat or cold.

Appendix C: Investigating COVID-19 Cases

All personal identifying information of COVID-19 cases or persons with COVID-19 symptoms, and any employee required medical records will be kept confidential unless disclosure is required or permitted by law. Un-redacted information on COVID-19 cases will be provided to the local health department, CDPH, Cal/OSHA, the National Institute for Occupational Safety and Health (NIOSH) immediately upon request, and when required by law.

Date:

Name of person conducting the investigation:

Name of COVID-19 case (employee or non-employee*) and contact information:

Occupation (if non-employee*, why they were in the workplace):

*If we are made aware of a non-employee COVID-19 case in our workplace

Names of employees/representatives involved in the investigation:

Date investigation was initiated:

Locations where the COVID-19 case was present in the workplace during the high-risk exposure period, and activities being performed:

Date and time the COVID-19 case was last present and excluded from the workplace:

Date of the positive or negative test and/or diagnosis:

Date the case first had one or more COVID-19 symptoms, if any:

Information received regarding COVID-19 test results and onset of symptoms (attach documentation):

Summary determination of who may have had a close contact with the COVID-19 case during the high-risk exposure period. Attach additional information, including:

- The names of those found to be in close contact.
- Their vaccination status.
- When testing was offered, including the results and the names of those that were exempt from testing because:
 - They returned to work per our return-to-work criteria and have remained symptom free for 90 days (or a different period than 90 days if it is required by a CDPH regulation or order) or, for those that never developed symptoms, for 90 days (or a different period than 90 days if it is required by a CDPH regulation or order) after the initial positive test.
- The names of those close contacts that were excluded per our Exclusion of COVID-19 Cases and Employees who had a Close Contact requirements.
- The names of those close contacts exempt from exclusion requirements because:
 - They were fully vaccinated before the close contact and did not develop COVID-19 symptoms, and are required to wear a face covering and maintain six feet of distance from others at the workplace for 14 days following the last date of close contact.
 - They returned to work per our return-to-work criteria and have remained symptom free, and are required to wear a face covering and maintain six feet of physical distance from others at the workplace for 14 days following the last date of close contact.
 - They never developed symptoms and are required to wear a face covering and maintain six feet of physical distance from others at the workplace for 14 days following the last date of close contact.

Notice given (within one business day, in a way that does not reveal any personal identifying information of the COVID-19 case) of the potential COVID-19 exposure to:

1. All employees who were on the premises at the same worksite as the COVID-19 case during the high-risk exposure period
2. Their authorized representatives (If applicable, the notice required by Labor Code section 6409.6(a) (2) and (c))

| Names of employees that were notified: | Names of their authorized representatives: | Date |
|---|---|-------------|
| | | |
| | | |
| | | |
| | | |

Independent contractors and other employers on the premises at the same worksite as the COVID-19 case during the high-risk exposure period.

| Names of individuals that were notified: | Date |
|---|-------------|
| | |
| | |
| | |
| | |

What were the workplace conditions that could have contributed to the risk of COVID-19 exposure?

What could be done to reduce exposure to COVID-19?

Was local health department notified? Date?

Appendix D: COVID-19 Training Roster

Additional Consideration #1

Multiple COVID-19 Infections and COVID-19 Outbreaks

This addendum will stay in effect until there are no new COVID-19 cases detected in the exposed group for a 14-day period.

COVID-19 testing

We provide COVID-19 testing at no cost to all employees, during paid time, in our exposed group except for:

- Employees who were not present during the relevant 14-day period.
- COVID-19 cases who did not develop symptoms after returning to work pursuant to our return-to-work criteria, no testing is required for 90 days after the initial onset of symptoms or, for COVID-19 cases who never developed symptoms, 90 days after the first positive test.

COVID-19 testing consists of the following:

- All employees in our exposed group are immediately tested and then again one week later. Negative COVID-19 test results of employees with COVID-19 exposure will not impact the duration of any quarantine, isolation, or exclusion period required by, or orders issued by, the local health department.
- After the first two COVID-19 tests, we continue to provide COVID-19 testing once a week of employees in the exposed group who remain at the workplace, or more frequently if recommended by the local health department, until there are no new COVID-19 cases detected in our workplace for a 14-day period.
- We provide additional testing when deemed necessary by Cal/OSHA.

We continue to comply with the applicable elements of our CPP, as well as the following:

1. Employees in the exposed group wear face coverings when indoors, or when outdoors and less than six feet apart (unless one of the face-covering exceptions indicated in our CPP apply).
2. We give notice to employees in the exposed group of their right to request a respirator for voluntary use if they are not fully vaccinated.
3. We evaluate whether to implement physical distancing of at least six feet between persons, or where six feet of physical distancing is not feasible, the need for use of cleanable solid partitions of sufficient size to reduce COVID-19 transmission.

COVID-19 investigation, review, and hazard correction

We immediately perform a review of potentially relevant COVID-19 policies, procedures, and controls and implement changes as needed to prevent further spread of COVID-19.

The investigation and review is documented and includes:

- Investigation of new or unabated COVID-19 hazards including:
 - Our leave policies and practices and whether employees are discouraged from remaining home when sick.
 - Our COVID-19 testing policies.
 - Insufficient outdoor air.
 - Insufficient air filtration.
 - Lack of physical distancing.

- Updating the review:
 - Every thirty days that the outbreak continues.
 - In response to new information or to new or previously unrecognized COVID-19 hazards.
 - When otherwise necessary.
- Implementing changes to reduce the transmission of COVID-19 based on the investigation and review.
We consider:
 - Moving indoor tasks outdoors or having them performed remotely.
 - Increasing outdoor air supply when work is done indoors.
 - Improving air filtration.
 - Increasing physical distancing as much as feasible.
 - Requiring respiratory protection in compliance with section 5144.

Buildings or structures with mechanical ventilation

We will filter recirculated air with Minimum Efficiency Reporting Value (MERV) 13 or higher efficiency filters, if compatible with the ventilation system. If MERV-13 or higher filters are not compatible, we will use filters with the highest compatible filtering efficiency. We will also evaluate whether portable or mounted High Efficiency Particulate Air (HEPA) filtration units or other air cleaning systems would reduce the risk of transmission and, if so, implement their use to the degree feasible.

Additional Consideration #2

Major COVID-19 Outbreaks

This addendum will stay in effect until there are fewer than three COVID-19 cases detected in our exposed group for a 14-day period.

We continue to comply with the Multiple COVID-19 Infections and COVID-19 Outbreaks addendum, except that the COVID-19 testing, regardless of vaccination status, is made available to all employees in the exposed group twice a week, or more frequently if recommended by the local health department.

In addition to complying with our CPP and Multiple COVID-19 Infections and COVID-19 Outbreaks addendum, we also:

- Provide employees in the exposed group with respirators for voluntary use in compliance with section 5144(c)(2) and determine the need for a respiratory protection program or changes to an existing respiratory protection program under section 5144 to address COVID-19 hazards.
- Separate by six feet (except where we can demonstrate that six feet of separation is not feasible and there is momentary exposure while persons are in movement) any employees in the exposed group who are not wearing respirators required by us and used in compliance with section 5144. When it is not feasible to maintain a distance of at least six feet, individuals are as far apart as feasible.
- Install cleanable solid partitions that effectively reduce transmission between the employee and other persons at workstations where an employee in the exposed group is assigned to work for an extended period, such as cash registers, desks, and production line stations, and where the physical distancing requirement (described above) is not always maintained.
- Evaluate whether to halt some or all operations at the workplace until COVID-19 hazards have been corrected.
- Implement any other control measures deemed necessary by Cal/OSHA.

Notes:
